BECKHAM ELICIBLE.

For Re-Election---The Opinion of Prominent Lawyers.

GOVERNOR WILL ANNOUNCE SOON.

The discussion of the question of the eligibility of Gov. J. C. W, Beckham for re-election for four years from December, 1903, has drawn to an investigation of it some of the leading members of bar in Kentucky, with the result that the Governor has secured a written opinion that there is no such bar to his ambition, says the Courier-Journal.

This opinion, which is now given to the public, was written by a former Chief Justice and for twenty-five years a member of the Ken tucky Court of Appeals-Judge William S. Pryor, and is endorsed and affimed by former Congressman and State Election Commissioner Capt Wm T. Ellis, of Owensboro, by former Chief Justice James H. Hazlerigg, now of the Frankfort bar; by former Governor J. Proctor Knott, of Marion county, one of the most prominent members of the Constitutional Convention, which drafted the section of the present Constitution under which the question of Gov Beckham's eligibility is raised, and who, while a member of the National Congress, was the Chairman of the Judiciary Committee, and by the Hon Lewis Mc Quown, of Bowling Green, chief counsel for the late Gov Goebel, and who directed his centest in all

This opinion and the indorsements of it are in the hands of Gov Beckham, to whom the communications are addressed. In addition to these opinions the Governor has within the past few weeks received from numerous well known lawyers over the state letters expressing the same opinion, after stating that they have looked thoroughly into the ques-

The promulgation at this time of this opinion of former Chief Justice Prior, and the endorsement of Captain Ellis and letters of Judge Hazlerigg, former Governor Knott and Mr. McQuown, are not, so close friends of the Governor say, to be understood as a formal announcement of his can didacy for re-election. But the formal announcement of his candidacy will be made within the next few weeks, and his campaign will then begin.

FEAR NOT.

- Fear not, the flowers are saying, When they sink beneath the snow For the spring will come a-Maying
- With he sweetest buds that blow;
- The rose shall wear her crimson, And the violet her blue, Fear not, for spring is coming
- To you, dear heart, to you. Fear not, the birds are singing,
- As they fly from pole to pole,
- There are nests that wait their winging, Where the kindlier seasons roll; The robin shall be shaming
- The blushes of the dawn,
 And the dove through his complaining Find a bough to nestle on.
- Fear not, the squirrels chatter As they frisk through forests lone,
- When the rain begins to patter
- To the winds in monot
- Though the woodland is forsaken Of boy and bird and bee, The silence yet shall waken
- To summer melody.
- Fear not, ye timid-hearted, here is no trouble long.
- For sorrow once departed
- Returns again, a song; No fears that come to vex us,
- No evils that befall, Can linger to perplex us,
- -Kate Brownlee Sherwood, in Boston

A HEAVENLY WOMAN.

BY KATHARINE TYNAN.

fruit of our love, and for so long I had | little heaven on earth. not revisited the glimpses of the moon. Indeed, I had not been here my amazement I found myself now but that the rout was for the laughing heartily at the play of the new hospital, and my friend Dean Delany had persuaded me to it, say- who, while we regaled ourselves with ness and originality, and its cloud of Some of the combinations are amus- cork—he jest went up 'nd up till he ing that it was something that my strawberries and cream under a chestangel would have exacted of me, and nut on the lawn, took to flinging that she would not have me lay down rose leaves upon each other, and even the duties of my station because the entered into their play, flinging my Lord had taken her from me.

" I knew the dean thought that my whence it came. seclusion had lasted long enough; yet never was snail torn so painfully from his shell as I from my house.

I caught sight of myself in a mirror in the ballroom, and marveled that the anguish of that time, the loneliness of the years, had not made a more enduring mark upon me.

I was dressed finely—like a bridegroom. I mocked at myself. My rascal Patrick had seen to that, and had had the tailor to me and the perruquier; and there I was in pearl gray silk from head to foot, and my wig curled finely, and a hint of essences about me-I, whose heart was as dead

ed by the vision of a lady who sat in I felt that my eyes were sudacross the ballroom.

I thought I had seen her before. vet surely she was different. I remembered a being of an innocent and bewitching milkmaid beauty who had been like her, vet unlike. If you could imagine a veil in the evening drawn over the morning you would have my lady as her saddened beauty appeared by that memory of milk and roses.

Some one stepped into the window by my side. It was the dean.

"Still here, my Lord Raheny," he began.

"Who is that lady?" I asked, indi-

cating the face that had just arrested

He did not look at me in curiosity as another might.

"That heavenly woman," he answered. "Why, she is Mrs. Bathurst. Don't you remember that she was Caroline Dillon, little Caro? She married Harvey Bathurst, who was killed in a duel with Buck Standish the year of your marriage."

I remembered the bright thing then, and my heart smote me. It was not so long from her calamity to

mine; and I had forgotten hers. "She was fond of her husband?" I

"She worshiped him. The manner Buck for a girl's honor-a mad, generous thing to do. But it enthroned that little seat cut in the ivy which toes, and a cup of coffee.' him in his wife's affections, whence perhaps life might have dispossessed

him." "He was a charming fellow,"

said I. "I have only known one man good enough for Caro," replied the dean. "But come, she is looking our way. Like yourself, she is lonely at this feast. I dragged her from her retire-

ation of State Dinners

Since Mrs. Lincoln's regime the -the walls were dark, the floors were ton, and the elevated roads of that tried every known expedient to get rid of the pests, but without avail. Then she had all the flooring in both kitchens and laundries taken out, the walls scraped, and even the space above the ceilings cleansed. The floors were replaced with cemented ones, the walls wainscoted with white brick tiling, and the remainder new-

On the east side of the large kitchen, in place of the mammoth fireplace of the original one, there is now an up-to-date hooded range room. Across from it are the dishwashing sinks, connected with the hot and cold-water pipes. From the circular hoop bristling with hooks, which are filled with shining brass pots and kettles. On the west side of the apartment are the tall cupboards resting on the flour and meal bins, while in its center is the long

Testing a Baby's Mind.

In an experiment whose purpose was to trace the stages of development of a baby's mind the infant was placed before a mirror daily. During the earliest stages of the test he simply looked at his reflection, as birds do. He next showed fear of it, as do many of the higher animals. He then grasped at it with his hands, as cats strike at reflections with their paws. Later he looked behind the glass to find the object, as cats and monkeys. have been known to do. But on the 420th day of his life he deliberately turned the glass at different angles to obtain required reflections, an intelligence not possessed by any animal other than man.

Testing a Baby's Mind.

In an experiment whose purpose was to trace the stages of development of a baby's mind the infant was placed before a mirror daily. During the Bonds. Eve earliest stages of the test he simply looked at his reflection, as birds do. He next showed fear of it, as do many of the higher animals. He then grasped at it with his hands, as cats strike at reflections with their paws. Later he looked behind the glass to find the object, as cats and monkeys have been known to do. But on the 420th day of his life he deliberately turned the glass at different angles to obtain required reflections, an intelligence not possessed by any animal other than man.

Hulin disappeared about the time the killing was supposed to have occurred, and did not learn of the case until a short time ago. Peake is now confined in an asylum, a raving maniac, as the result of his trou-

The annual report of the commissioner of education, just submitted to the secretary of the interior, shows that the grand total of pupils in schools, elementary, secondary and higher, both public and private, in the United States for the year ended June 30, 1901, was 17,-299,230, an increase of 278,520 pupils over the previous year. Of this number the enrollment of pupils in institutions supported by general and local taxes furnished by states and municipalities was 15,710,394, as against 15,443,462, the number reported fer the previous year.

Representatives of the coal miners of Pennsylvania, in convention at Wilkesbarre, declared the strike off and accepted the proposition to leave their differences to the commission appointed by President Roosevelt. The vote on the quescalled the strike off, they unanimously adopted resolutions thanking all national, state and municipal governments, all organizations and individuals throughout the world, for assistance rendered the miners during their great struggle. President Mitchell expressed himself as highly gratified at the action of the convention. He will act as attorney for the miners before the commission.

The annual report of the commissioner of immigration shows that of the 648,743 immigrants who arrived in the United States during the last year, 466,369 were males and 182,374 females. Of the entire number of arrivals, Italy supplied 178,375, an increase of 42,379 over the number for 1901; Austria Hungary, 171,989, an increase of 58,599, and Russia 107,347, an increase of 22,090. Most European countries showed an increase, but there was a falling off in the arrivals from Ireland amounting to 1,423, the total from that country being 29,138. The figures concerning Asiatic immigration show a decrease from China of 810, the total being 1,649, and an increase from Japan of 9,001, the total being 149,270, or 170 per cent. Of the entire number arriving, 162,188 were unable to read or write, but 74,063 were under 14 years of age. The total number of aliens refused permission to land was 4,947, or about two-thirds of 1 per cent of contracted laborers.

LESSON IN AMERICAN HISTORY IN PUZZLE

The friars at the Franciscan monastery, near Palos, at which Columbus stopped while making his way from Lisbon to Spain, played an important part in the life history of the discoverer of the new world. It was from them that he received encouragement, and through them that he secured his audiences with the Spanish sovereigns, and it was at this place that his son was educated. His first visit to this monastery was in the fall of 1484.

PAUL KRUGER.

The Boer Leader as He Appeared to a Recent Interviewer.

Paul Kruger is not educated in "company manners," and he is not finished in small talk. He speaks as a man having something to say, States has made such remarkable is attractive, and, says Harry Steele he talks, one listens and realizes that The prolonged Pennsylvania coal he is in the presence of a man poscessing that wonderful spark which God has implanted in natural rulers

"So you're an American," he said,

Paul Kruger was sincere when he said he was sorry that Edward VII. was not crowned on the day set for the ceremony. I could not imagine him saying anything that he did not

He said "America," and then there was a half-minute pause. "You must have a great land there," he continued. "I have heard about it from Dr. Leyds and Herr Fischer. I once thought I, too, would go there, but now it is of no use. I am old, much too old to travel."

As this old man spoke, it seemed United States court; E. E. Clark, to me that he must be lonely. As I suming that for the purpose of such "Don't you expect to return to South a commission the term sociologist Africa?" He shook his head sadly. studied deeply on social questions sometimes wished myself there, since and has practically applied his I came to Europe, but it was not Scranton, Pa., as a man practically too old to go with the commandoes, selling of coal; Bishop John L. thought I would do more good here. sion. Immediately upon reaching peace terms. There is nothing to make me want to return. Everything will be changed, and die land is free no longer. It is better that I should end my days here."

Bitter disappointment echoed in every word. He had come to Europe with the hope of persuading some government to attempt arbitration in behalf of the Boers, and every door had been shut in his face. The purpose of his trip had failed, and, more bitter than all else for his lion heart, he had been accused of fleeing from a victorious enemy.

SECRET OF BIRD SOARING.

A Naturalist Who Thinks He Has Found It Inside the Quills.

What is the motive power of a quiescent bird that moves it through air resistance and keeps its heavy body from falling? We are absolutely baffled when confronted with the problem of a soaring bird. It does not move its wings when it has once got well started; its moving parts seem to be of use merely to get it off to some unknown dead center; it has infinite capacity for taking advantage of balance, and all this is done while violating every known mechanical law, holding up a heavy body in the air, and overcoming strong atmospheric resistance at a rapid rate without discoverable expenditure of energy.

Yet, says Chambers' Journal, weight is absolutely necessary for flight, and the relative area of wing expanse diminishes as the weight of the bird increases. For example, a gnat, which possesses a very light, fairy-like body, has about eleven times the wing area of a swallow in proportion to the weight of each. I have been trying to discover the exact structure of a bird's surfaces which enables it to get the soaring force from the air pressure under its wings for the past fifteen years. The task seemed hopeless until accident settled the case. I had located in the foothills of the Flat Top mountains of Colorado, in the dry air of that region, to prosecute my task, where the yellow-tailed hawks, that were admirable soaring birds, were abund-

A precipitous cliff 1,000 feet high was near, from which I floated all til I see whether I am going to win sorts of surfaces, and year after year the quest went on. A furious forest "De Grouch ought to be happy fire had filled the air with smoke and wood was in evidence for months. I detected on the sides of the quill between the spicules that was not before seen. A small magnifier gave it the appearance of discolorations about the throat of a dust exhaust in a planing mill.

A microscope was at once procured, with an outfit of objectives from 60 to 100 diameters, and in an hour's time I knew more about bird flights than 25 years of study had given me. The discolorations extended along each spicule between the plates. The downy filaments filling the doublewall structure of the wings were stained in the same unusual manner. This stain, when scraped off and examined, resembled soot from a stovepipe, showing that the air had been going through the wing in an incessant stream, carrying the smoke and carbon particles of the fire with it. I had been the slave of preconceived

And this brings me to the device that soars the bird. What is a feather? It is an air engine, and the bird surfaces are made of them. They have been looked on as a light, flexible material for making an extended surface impervious to air that would readily fold upon itself, and their exquisite mechanical structure call on the Hobsons." Mrs. Dodson has been overlooked. They consist of -"Oh, John, you know well enough a quill and two vanes made up of spicules, between which are the plates. ple." Mr. Dodson-"Yes, I know. The plates cross a channel about one-That's the reason I want you to go | fortieth of an inch wide, made by the spicules. There are about 1,000 of them to the inch, being practically innumerable, and they are located at the outer surface, filling about onefifth part of the depth of the channel. They are about the twenty-thousandth part of an inch thick, as nearly as an amateur with a microscope could determine, so that nineteen-twentieths of the space of the channels is open to the passage of air.

The mechanical service of the plates is obvious. The curve impinges against the air current through the feathers and drives the bird to the front. Pressure produced by the normal factor of weight is thus made to serve as the motive power of flight.

LIVINGSTON COUNTY.

Ollie James carried Livingston county by a majority of 612. Nunn's majority is 603.

James carried every county in the district, thirteen in all. Eleven of these counties will give him big majorities, while he carried Caldwell and Crittenden, usually Republican, by small majorities.

George D. Hughes, Democrat, was elected magistrate in Fords Ferry precinct, and C. R. Eddings Democrat, was elected constable in the Bells Mines and Rosebud precincts. These were the only candidates voted for in the county other than Congressman and Appeliate Judge.

It is impossible to estimate the total majorities of James and says: Nunn. The returns are very slow in coming in. That they were elected by overwhelming majori. ties there is no doubt. Judge Nunn loses Critteneen, Hopkins, and Caldwell counties by small majorities. The Appelate district is normally Democratic by 12.000 to 16,000.

NEW YORK REPUBLICAN

By a Small Majority --- Returns From Other States.

REPUBLICANS CONTROL CONGRESS.

Odell was re-elected Governor of New York by the Republicans. His majority is estimated at \$10,-000. Coler, the Democratic nominee, carried New York city by 117,800, but Odell came to the Harlem with a majority exceeding 125,000.

The Republican majority in Ohio will reach 80,000.

Tennessee Democrats elected James B. Frayser Governor by 38,000 majority.

Colorado elected a Democratic Legislature and a Republican Go-

the next House of Representatives by a small majority. The Democrats however have increased their strength in the House. Thirteen Southern States, not counting assistance of her husband. A West Virginia, but including Mis- truce was, however, forced by But souri, have 128 representatives. The Democrats have carried 116 of the districts, and the Republicans possibly five, two in Tennessee, one in Kentucky and two in Missonri, with two in North Caro. day and looked the worse for the lina, one in Virginia and one in row, as his eyes were well black. Alabama, doubtful according to latest returns.

The next United States Senate will be Republican by at least fifteen majority against the present majority of twenty.

The Democrats carried the city of Boston by 14,000 majority.

North Carolina went Democratic by 83,000 majority.

The Republican majority in Indiana will exceed 25,000.

Elect Ten Congressmen and Four Appelate Judges.

Dispatches from Louisville to the PRESS state that the Democrats were victorious throughout the state. Ten Democratic congressmen were elected. The Republicans were only successful in the Eleventh District, however the Republican majority was greatly reduced in that district. Jno. S. Rhea's majority over

Moss in the Third is between 1000 and 1500. Kehoe's majority in the Ninth will exceed 2000 The hardest fights were made in these districts.

The Court of Appeals will be Democratic, five democratic judges and two Republican judges. The four new judges elected by the Democrats were Nunn, Paynter, Barker and Settle.

The city of Louisville went Democratic by a large majority.

SISCO RESTLESS.

Very Nervous and Does Not Want To Return to Marion.

A dispatch from Henderson

"George M. Sisco, charged with the assassination of Miss Etta B Williamson, of Crittenden county is still silent in regard to the killing. He is very nervous and never speaks unless spoken to, in which case his answers are as short as he can make them. He is apparently in a surly mood at all times. He eats and sleeps very little. When the subject of the killing of Miss Williamson is rea ched it is at once apparent that it is distasteful to him and he quickly says his lawyers have com manded him to keep silent. He says he does not want to go back to Marion until the feeling against him subsides. He will not discuss his line of defence.

[Padueah Register].

Sunday S. P. Butler and wife. who live in Livingston county near Smithland loaded themselves into a wagon and drove over to the home of John Fleming, father of Mrs Butler, to pay him and his wife a visit. It was the first visit for some time, owing to the fac that the best of feeling did not exist between the men.

Arriving at the home of Mr Fleming, which is near Ledbetter on the Point, Butler was about to get out of the wagon when Flem ing appeared with an ax and made at him with a determination to do him up. Butler was able to ward off the blow with his arm and to grab the ax and jerk it from Flem The Republicans will control ing's hands. He then seized hold of Fleming and for a while each pummeled the other, but Butler was getting the best of the row when Mrs Fleming came to the ler from Fleming and he took advantage of this to remount the wagon and move off and return

He was in Smithland the next ened and his arm was bruised to some extent, where he warded off the ax. The parties are both well known citizens of Livingston county, and the row was quite a

LIVINGSTON COUNTY.

Ollie James carried Livingston inty by a majority of 612. nn's majority is 603.

James carried every county in the district, thirteen in all. Eleven of these counties will give him big majorities, while he carried the Democratic ticket would win Caldwell and Crittenden, usually Republican, by small majorities.

> George D. Hughes, Democrat, was elected magistrate in Fords Ferry precinct, and C. R. Eddings Democrat, was elected constable in the Bells Mines and Rosebud precincts. These were the only candidates voted for in the county other than Congressman and Appeliate Judge.

It is impossible to estimate the total majorities of James and Nunn. The returns are very slow in coming in. That they were elected by overwhelming majorities there is no doubt. Judge Nunn loses Critteneen, Hopkins, and Caldwell counties by small majorities. The Appelate district is normally Democratic by 12.000 to 16,000.

NEW YORK REPUBLICAN.

By a Small Majority --- Returns From Other States.

REPUBLICANS CONTROL CONGRESS.

THE TRAPPIST MONKS OF IOWA

One of the Most Prosperous Communities in the United States.

HE prosperous region known as the "middle west" is not associated HE prosperous region known as the initial west in the public mind with exemplary monastic institutions, yet the states of Indiana, Michigan, Illinois, Minnesota, Wisconsin and Iowa shelter of Indiana, Michigan, Illinois, Minnesota, Wisconsin and Iowa shelter quite an army of hooded monks, among whom the Trappists are perhaps the most prosperous body. At New Mellery, just outside of the thriving Iowa city of Dubugue, is located their principal monastery. The order occupies 3,000 acres of land and the buildings thereon are valued at not less

The monastery was founded over half a century ago by the brethern | . . who came to the United States from Waterford, Ireland. They bought 3,000 acres of land at 25 cents an acre, and to-day this land is worth \$80 per acre. They began agricultural operations at once, and in the course | the of time transferred the tract into an attractive grain, fruit and vegetable garden. They manufacture their own tools, furniture and clothing, of raw materials obtained from the monastery grounds.

The rules of the order provide that each brother have some special employment. Thus it comes that at New Mellery may be found expert blacksmiths, tailors, masons, carpenters, machinists, shoemakers, tinsmiths, physicians and even lawyers. Repair work is done for outsiders, for which

TRAPPIST MONASTERY NEAR DUBUQUE, IA.

no fixed charge is made, it being optional with the customers whether they pay anything or nothing at all.

A layman who recently visited the monastery says that the most remarkable rule in force is one requiring perpetual silence. Without permission from his superior, which is granted only in case of emergency, a Trappist never speaks, except in prayer. All sleep in a common dormitory. The beds are placed against the opposite walls in two rows, and in the center of the room stands an image of the Virgin. A plank and straw mattress constitute the furnishings of each bed. The brethren retire to rest at seven in the evening and arise at two in the morning, when they at once go to the chapel for mass. There they spend several hours praying, meditating and chanting psalms. Flesh meat is never allowed, except to the sick, and those in health take but one meal and a collation in winter and two meals in summer. Eggs, cheese, fish and butter are among the forbidden articles of diet, the only food allowed being bread, they told ought to be all printed in The very air was full of lead, and which is doled out in meager allowances on Sunday.

The march of the monks from the dormitory to the chapel, cowled and with tunics belted about their bodies, is described by the same observer as being exceedingly solemn. They go in twos, hardly making a sound with their feet as they pass under the hyssop of the abbot, and in the dimness of the artificial light they appear as so many skeletons

marching to the grave. The only salutation that ever passes between the brethren is "memento mori" (remember death.) Indeed the thought of death seems to appear uppermost in their minds. Each monk daily digs out part of the grave that is to receive his remains. When the grave is completely dug is the same the year around, as they wish to show a contempt for the body and a design to be living rebukes to luxurious worldlings.

Some of the monks are priests, and others only lay brothers. But all, including Abbot David, work in the fields, with the exception of those whose labor is required in the shops or the house.

The Vice Regal Lodge at Dublin Official Home of the Lord Lieutenant of Ireland.

LTHOUGH Ireland is, in the strict sense of the word, a province, ruled by a lord lieutenant appointed by the British king, yet its court is one of the gayest in Europe. It is maintained with the utmost splendor, and none but a very rich man can afford to preside over it. The salary attached to the office of lieutenant governor is \$200,000 per year, but Earl Cadogan, who has just vacated the post, spent nearly three times that amount every twelvemonth. The new lord lieutenant, the earl of Dudley, is one of the richest peers of the realm and will, no doubt, keep up the reputation as a royal entertainer established by his prede-

The vice regal lodge at Phoenix park is the house in which the viceroy and vicerine, as his lady is called, spend most of their time, but entertaining is done at Dublin castle, their other official home. That portion of Phoenix park in which occurred the historic murders of Lord Frederick Cavendish and Mr. Burke is, it might be remarked incidentally, within sight of the windows of the lodge. The lord lieutenant "goes into residence," as it is called, early in February, and after that comes a season of brilliant drawing rooms, ending with St. Patrick's ball, which is an unusually gorgeous function. The drawing-rooms take place at 9:30 in the evening, in the throne room of Dublin castle, the walls of which are ornamented by famous medallions. The throne chair, which is of the time of William III., is of richly embroidered velvet, and is ornamented

VICE REGAL LODGE IN PHOENIX PARK, DUBLIN

with a gilt crown, lion and unicorn. It stands under a canopy of white and gold, on which the royal arms also appear, and which is trimmed with crimson Irish poplin. Debutantes are required to dress in white, with white ostrich feathers in their hair; the men wear court dress, or uniforms, with knee breeches and silk stockings. For years it has been the custom for the viceroy to salute each lady on the cheek, but Earl Cadogan decided to let the custom die out, and his example will be followed by Earl Dudley. Dignity has been a characteristic feature of Irish drawing-rooms for years, but it used to be put somewhat in the background in the good old days, when the lady lieutenant frequently gambled at piquet with her guests, while the records relate that on ball nights "the

ladies scrambled for sweetmeats on the floor." The retinue of the viceroy includes a state steward, chamberlain, comptroller of the household, master of the horse, gentleman usher, three gentlemen in waiting, nine aides-de-camp and several secretaries and other high-salaried officials. To all intents and purposes the lord lieutenant of Ireland is indeed a king. He sits on a throne, he has a magnificent military escort, and a court circular, narrating his actions, is issued every day. Should the prince of Wales, for instance, visit Ireland and be entertained by the viceroy, the heir apparent would have to go into dinner behind the nobleman representing his father. But with the real government of the country the viceroy has very little to do-that is looked after by the Irish secretary, the responsible officer of the British government. The lord lieutenant's one function is to represent the king in a fitting manner by maintaining a great deal of state and entertaining lavishly.

THE TRAPPIST MONKS OF IOWA

One of the Most Prosperous Communities in the United States.

HE prosperous region known as the "middle west" is not associated in the public mind with exemplary monastic institutions, yet the states of Indiana, Michigan, Illinois, Minnesota, Wisconsin and Iowa shelter in the public mind with exemplary monastic institutions, yet the states ! quite an army of hooded monks, among whom the Trappists are perhaps the most prosperous body. At New Mellery, just outside of the thriving Iowa city of Dubuque, is located their principal monastery. The order occupies 3,000 acres of land and the buildings thereon are valued at not less

The monastery was founded over half a century ago by the brethern | . ENTLEMEN, I propose a and took him by the hand, and his who came to the United States from Waterford, Ireland. They bought 3,000 acres of land at 25 cents an acre, and to-day this land is worth \$80 per acre. They began agricultural operations at once, and in the course | the of time transferred the tract into an attractive grain, fruit and vegetable garden. They manufacture their own tools, furniture and clothing, of raw of the Republic were gathered in cans of commissary nectar."

materials obtained from the monastery grounds. The rules of the order provide that each brother have some special the last time on earth, probably, in crans, at Arlington National cemeemployment. Thus it comes that at New Mellery may be found expert | the capital city of the great re- tery, Speaker Henderson said: "When blacksmiths, tailors, masons, carpenters, machinists, shoemakers, tinsmiths, physicians and even lawyers. Repair work is done for outsiders, for which

TRAPPIST MONASTERY NEAR DUBUQUE, IA.

no fixed charge is made, it being optional with the customers whether

they pay anything or nothing at all. A layman who recently visited the monastery says that the most remarkable rule in force is one requiring perpetual silence. Without permission from his superior, which is granted only in case of emergency, a Trappist never speaks, except in prayer. All sleep in a common dormitory. The beds are placed against the opposite walls in two rows, and in the center of the room stands an image of the Virgin. A plank and straw mattress constitute the furnishings of each bed. The brethren retire to rest at seven in the evening and arise at two in the morning, when they at once go to the chapel for mass. There they spend several hours praying, meditating and chanting psalms. Flesh meat is never allowed, except to the sick, and those in health take but one meal and a collation in winter and two meals in summer. Eggs, cheese, fish and butter are among the forbidden articles of diet, the only food allowed being bread, milk and vegetables. The luxuries of the community are confined to snuff, which is doled out in meager allowances on Sunday.

The march of the monks from the dormitory to the chapel, cowled and with tunics belted about their bodies, is described by the same observer as being exceedingly solemn. They go in twos, hardly making a sound with their feet as they pass under the hyssop of the abbot, and in the dimness of the artificial light they appear as so many skeletons

The only salutation that ever passes between the brethren is "memento mori" (remember death.) Indeed the thought of death seems to every soldier loved and whom every perance man, but in army days, and appear uppermost in their minds. Each monk daily digs out part of the brave soldier knows went to his for some years subsequently, the old grave that is to receive his remains. When the grave is completely dug grave with a heart sore, because his soldiers all took naturally to comhe throws the dirt back into it and begins the digging anew. Their dress grand services were requited with inis the same the year around, as they wish to show a contempt for the body and a design to be living rebukes to luxurious worldlings.

Some of the monks are priests, and others only lay brothers. But all, including Abbot David, work in the fields, with the exception of those whose labor is required in the shops or the house.

The Vice Regal Lodge at Dublin

Official Home of the Lord Lieutenant of Ireland.

LTHOUGH Ireland is, in the strict sense of the word, a province, ruled by a lord lieutenant appointed by the British appointed by the British appointed by the British appoint most splendor, and none but a very rich man can afford to preside over it. The salary attached to the office of lieutenant governor is \$200,000 per year, but Earl Cadogan, who has just vacated the post, spent nearly three times that amount every twelvemonth. The new lord lieutenant, the earl of Dudley, is one of the richest peers of the realm and will, no doubt, keep up the reputation as a royal entertainer established by his prede-

The vice regal lodge at Phoenix park is the house in which the viceroy and vicerine, as his lady is called, spend most of their time, but entertaining is done at Dublin castle, their other official home. That portion of Phoenix park in which occurred the historic murders of Lord Frederick Cavendish and Mr. Burke is, it might be remarked incidentally, within sight of the windows of the lodge. The lord lieutenant "goes into residence," as it is called, early in February, and after that comes a season of brilliant drawing-rooms, ending with St. Patrick's ball, which is an unusually gorgeous function. The drawing-rooms take place at 9:30 in the evening, in the throne room of Dublin castle, the walls of which are ornamented by famous medallions. The throne chair, which is of the time of William III., is of richly embroidered velvet, and is ornamented

VICE REGAL LODGE IN PHOENIX PARK, DUBLIN.

with a gilt crown, lion and unicorn. It stands under a canopy of white and gold, on which the royal arms also appear, and which is trimmed with crimson Irish poplin. Debutantes are required to dress in white, with white ostrich feathers in their hair; the men wear court dress, or uniforms, with knee breeches and silk stockings. For years it has been the custom for the viceroy to salute each lady on the cheek, but Earl Cadogan decided to let the custom die out, and his example will be followed by Earl Dudley. Dignity has been a characteristic feature of Irish drawing-rooms for years, but it used to be put somewhat in the background in the good old days, when the lady lieutenant frequently gambled at piquet with her guests, while the records relate that on ball nights "the

ladies scrambled for sweetmeats on the floor." The retinue of the viceroy includes a state steward, chamberlain, comptroller of the household, master of the horse, gentleman usher, three gentlemen in waiting, nine aides-de-camp and several secretaries and other high-salaried officials. To all intents and purposes the lord lieut mant of Ireland is indeed a king. He sits on a throne, he has a magnificent military escort, and a court circular, narrating his actions, is issued every day. Should the prince of Wales, for instance, visit Ireland and be entertained by the viceroy, the heir apparent would have to go into dinner behind the nobleman representing his father. But with the real government of the country the viceroy has very little to do-that is looked after by the Irish secretary, the responsible officer of the British government. The lord lieutenaut's one function is to represent the king in a fitting manner by maintaining a great deal of state and entertaining lavishly.

THE BOLL WEEVIL AGAIN.

Synopsis of a Speech by Prof. Mal-

ly, Recently Delivered at

Shepherd, Texas.

We should understand in the be-

ginning that there is no use in fight-

ing boll weevil with remedies alone.

We must combine spraying with "cul-

tare methods." This matter has been

fully covered in my reports, but I

wish to emphasize now that it is only

ighting the hibernating brood

which is short lived, in the spring,

hat we can succeed in handling the

once appears, spraying for boll weevil

is useless. In this locality spray only

in early May and throughout the

month of May. Failure to do this

acounts for the many failures that

people report in the use of poisons.

The hibernating weevils come from

April, and by the end of May 95 per

cent. of the winter brood has come

into sight, therefore the fight must

be made before June 1.

boll weevil. When the summer brood

ser to nature, and more intimately

ssociated with the creative power

han any other. "The poor we have

always with us," and no doubt we

Spraying late in the season does not prevent the boll weevil from doing his leadly work, but there are some four hundred varieties of insects that prey upon cotton which singly are less destructive than the weevil, but in the aggregate are often as harmful as is this pest. Spraying does kill many of these other varieties of insects and it often pays to spray late in the season on their account even when no boll weevil is to be found. In his discussion of the subject

damage, but they prepare for the

harmful July brood. From May 18 to

he 25th I have sprayed cotton suc-

essfully and prevented summer crops

Prof. Mally threw down the gauntlet to those who have failed to secure results by spraying, and of those present interested in the subject, he asked that they read his reports closely and then determine whether or not they had consistently followed the directions therein contained. The statements and evplanations appeared to meet all of the inquiries of the cotton growers present and to give very general satisfaction .- Texas Farm and Ranch.

THANKSCIVING.

President Roosevelt Tells Why We Should be Thankful.

Washington, October 29.—President Roosevelt today issued his proclamation designating Thursday, November 27th, as a day of thanksgiving. The proclamation | tion last week. is as follows:

According to the yearly custom of our people, it falls upon the President at this season to appoint | too old to learn, sonny, a day of festival and thanksgiving to God.

Over a century and a quarter has passed since this country took its place among the nations of the earth, and doring that time we have had, on the whole, more to be thankful for than has fallen to the lot of any other people. Generation after generation has grown to manhood and passed away; each has had to bear its peculiar burdens, each to face its special crisis, and each has known years of grim trial, when the country was menaced by malice, domestic or foreign levy, when the hand of the Lord was heavy upon it in drouth or flood or pestilence, when in bodily distress and anguish of soul it paid the penalty of folly and a froward heart. Nevertheless, decade by decade we have struggled onward and upward; we now abun dantly enjoy material well-being; and, under the favor of the Most High we are striving earnestly to achieve moral and spiritual uplifting. The year that has just closed has been one of peace aud overflowing plenty. Rarely has any people enjoyed greater prosperity than we are now enjoying. For this we render heartfelt and solemn thanks to the Giver of all good, and we seek to praise Him, not by words only, but by deeds, by the way in which we do our duty to ourselves and to our fellow

Now, therefore, I, Theodore Roosevelt, President of the United States, do hereby designate, as a day of general thanksgiving, Thursday, the twenty-seventh day of the coming November, and do hood. recommend that throughout the ordinary occupations, and in their of our people. several homes and places of worship render thanks unto Almighty God for the manifold blessings of the past year.

In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

this twenty-ninth day of October. in the year of our Lord one thousand nine hundred and two, and of the independence of the United States the one hundred and Kentucky. twenty-seventh.

THEODORE ROOSEVELT. By the President.

John Hay, Secretary of State.
